

Video Converter / 3 Device Switch

Connects up to 3 audio/video devices to a television equipped with only an "F" jack input.

- Auto search feature eliminates the need to manually select the desired devices. Unit automatically selects the connected device when the power is turned on.
- Auto switching technology eliminates the need to manually switch between ANT/Cable and connected devices.
- Compatible with RCA type connections.
- A front audio/video input allows for convenient connection of portable devices such as camcorders and portable DVD players.
- Eliminates the need to continually connect and disconnect equipment.
- Can be positioned vertically (without the included stand) or horizontally (using the included stand).
- Selectable channel 3 or 4 output.
